USTI (UNIVERSITY SAINS AND
TECHNOLOGY)

- Computer Science
- GPA: 3.66 / 4.0

2016-2019

SMK DWI SEJAHTERA

- Computer and Network
Engineering

PROFILE

I have just completed a 4-year study period at a university in Pekanbaru, Riau called the Indonesian Science and Technology University (USTI), which was previously named STMIK AMIK RIAU. I am currently 25 years old, have a hobby of learning new things, and can work independently or as part of a team. I am still in the process of learning to master my interest in the field of Frontend Development.

WORK EXPERIENCE

Currently Not Available

- Since I have just finished my studies, I can say that I currently do not have work experience. However, I worked for a few months as a waiter at a cafe owned by a friend of mine. There, I learned how to communicate with different categories of customers and ensure that they were comfortable and satisfied while at the cafe. Currently, I am still in the learning phase to achieve my interest in becoming a frontend developer. For now, I am still using AI to help me with projects or other exercises related to web programming.

SKILLS

- PHP
- HTML
- CSS
- JAVASCRIPT
- LARAVEL
